

Patient: Aizah

Young female mid 20's mild Learning Difficulties patient of Asian ethnicity with refugee status. Living in shared accommodation with no extended family here in the UK besides her husband who doesn't live with her currently due to current accommodation situation. With English as a second language it is causing some difficulties that can be rectified with support. Aizah is now pregnant and has been diagnosed with Gestational Diabetes.

Patient: Dominic

Young male early 20's has suffered a leg injury while playing football, first responder Kate arrives on the scene to assess the situation and administer primary care. Further assessment confirms a fracture and Dominic will require physiotherapy to recover full mobility.
